REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School District of New Boston:

I hereby submit my annual report as Superintendent of Schools.

The current school year opened with several changes in our teaching staff. Carroll E. Sanderson (formerly of Warner) replaced C. Edgar Stevens as headmaster and instructor in Vocational Agriculture. Sophie Gagalis of Manchester (as teacher in Social Studies) and Martha H. Colburn (in the primary room) replaced Gale Huntington and Helen P. Gutterson respectively. Althea B. Sanderson was engaged to teach the upper primary room.

At the school district meeting of March, 1947 the problem of providing adequate housing for our increasing school population was discussed. One plan called for the upper two years of the high school to be provided for in neighboring high schools. A second plan called for the renovation of the Community House into a classroom unit. The latter plan was followed, and grades 5 and 6 were accommodated in that building when school opened last September. Although we have experienced minor difficulties in such an arrangement, by and large it has satisfactorily served its purpose.

However, present indications are that we are now in the same position as of a year ago. As you will see by the statistical table found elsewhere in this report, our primary room—Grades 1 and 2—now numbers 47, and indications are that we will have another large group entering grade 1 next fall. Not only should the entering grade 1 be set-up as a separate unit, but the present primary group should be divided. No teacher can be expected to secure successful educational results with a group of 47 pupils in two grades.

Obviously the school district is compelled to find added quarters before September 1 of this year. Several possible solutions have been offered, and your school board has tried to provide for them in its warrant. To the school board there are three answers to the problem:

1. Construct an addition to the present school building, and completely renovate the interior. Our facilities in the present building are very inadequate for the number of pupils housed in the building. Not only are we short of classroom space, but our toilet facilities are very inadequate.
2. Transport the upper years of the high school to neighboring towns on a tuition basis, and—
3. Transport to other towns certain of our elementary pupils living near the town boundaries. (It is questionable if this plan will relieve our situation at points of greatest pressure.)

The reader may wonder why the suggestion of a co-operative high school is not included under the above solutions. The so-called cooperative school bill, which was passed by the state legislature in 1947 provided that two or more school districts could combine for the purposes of joint operation of one or more schools on either an elementary or secondary level. Briefly the bill provided that the districts so uniting would be called upon to bond themselves in the same ratio as existing between their equalized valuations. In other words, if New Boston, Goffstown and Weare were to form a cooperative district for secondary school purposes, New Boston would be required to carry 13.5% of the total bonded indebtedness. Operational costs would undoubtedly be shared on a per-pupil basis,—in the particular case suggested above, approximately 21%.

The primary reason for not including the cooperative school plan with the three suggestions above is that some solution must be reached by September, 1948, and to secure immediate agreement and action by several towns on a co-operative plan is an impossibility. Furthermore, New Boston's share of the bonded indebtedness of a cooperative school project would be of such proportions as to practically prohibit future borrowing on the part of the school district for the next 10 or 15 years, which would mean that the district would not be in a position to make any extended alterations in its school plant during that time. Certainly the proposition is worthy of serious consideration, but the facts are such that the solution can not be hastily approved.

New Boston's problem is indeed a serious one. As has been mentioned above, our present building is in need of extensive renovation. Educationally the present plant does not lend itself to an adequate program for the pupils. Under present conditions such phases of the accepted school program as music, art, physical education, noon lunch program, and many others can not be provided for. Whatever plan we follow, we should provide for that type of program which will best serve the educational needs of the young people of New Boston during the years ahead.

Respectfully submitted,

LEWIS F. FOOTE,
Superintendent of Schools.

REPORT OF THE SCHOOL NURSE

Good health is given first place among the needs of children. All should be as healthy as possible, and should learn how to remain healthy.

In our work with the school children, we have had, and continue to have, the support and understanding of the parents and the several organizations in the towns. These groups have been actively interested in aiding in correcting at least four of the outstanding and common defects found in school children; namely, teeth, vision, hearing and tonsils.

I would like to suggest that the child who is to enter school for the first time in the fall should have a thorough examination by a physician and by a dentist in the spring or early summer. This will allow the summertime for the correction of defects, and for vaccinations, also immunizations if needed. Frequent use of clinics afford an opportunity for an early diagnosis, treatments and corrections with little or no expense.

Nearly every pupil in our schools has had the Patch test for tuberculosis. In January, 1947 and again in November, 1947, 57 took the test.

A toxoid clinic was held May 27, 1947 for pre-school children. Five in the first grade were given the treatment. Nearly all of the other pupils had had this immunizing done before entering school.

In the fall of 1946, the beginning of our 1947 school year, about 160 pupils were examined by our school physician, Dr. Fraser. The following report shows the number of pupils affected, and the number of defects corrected at this time:

Defective vision, 19	Number of defects corrected, 17
Defective teeth, 120	Number of defects corrected, 86
Diseased tonsils, 6	Number of defects corrected, 3

There were three orthopedic cases who had a check-up at least once a year, and one is still under treatment. We have been quite free from any epidemics until this fall. Up to the present time we have had 29 chicken pox cases, and 2 mumps cases.

EDITH G. WALKER,
School Nurse.
